

DEPARTMENT OF CSE

PROJECT SYSTEM DESIGN SUBMISSION

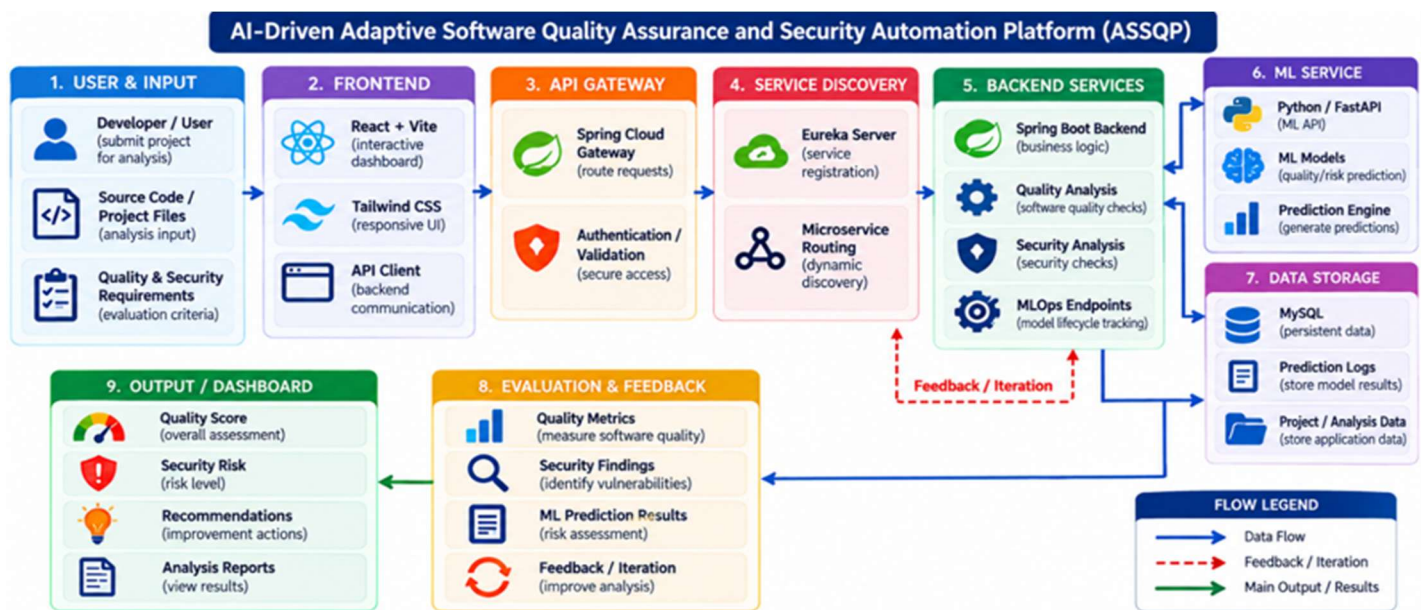

COURSE: ADAPTIVE SOFTWARE ENGINEERING– (24CI3201)

A.Y. 2026 - 2027

TITLE OF THE PROJECT	AI-Driven Adaptive Software Quality Assurance and Security Automation Platform	
S. No.	University ID	Name
1	2420030540	Allipuram Akhil
2	2420030546	P. Ruthvik Reddy
3	2420030579	S. Akshay Veer
4	2420030141	B. Akhil Varma
Name of the Guide		Dr. J. Kavitha Reddy

Project System Design

AI-Driven Adaptive Software Quality Assurance and Security Automation Platform collects project files through a **React + Vite frontend** and sends requests through the **Spring Cloud API Gateway**. **Eureka Server** manages service discovery, while **Spring Boot microservices** perform quality and security analysis. The **ML service** predicts quality and security risks, with **MySQL** storing project and prediction data. Finally, the dashboard displays quality scores, risks, recommendations, and reports for continuous improvement.
